Instructions for Bike / Ped Counting
Geog 283 – Spring 2018

1. Confirm your counting location and time from the schedule

2. Arrive at your counting location at least 10 minutes before your count time so you can get set up and “in the groove.”

3. Indicate your position on the Count Form.

4. You will be counting for 1 hour total.

5. Use the 15 minute increments on the Count Form so you don’t lose track.

6. If you are the ONLY person at your location, count ALL crossings in ALL directions.

7. If there are multiple people counting at your location, divide up the work as we discussed in class.

You will be standing outside for an hour so bring a hat or sunscreen and water.

Be safe.
